ART UNIT PAPER NUMBER

2623

SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/02/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 09/870,267	Applicant(s) WHITE ET AL.	
	Examiner Ngoc K. Vu	Art Unit 2623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 November 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 19-31 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 19-31 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Response to Arguments

1. Applicant's arguments filed 11/9/06 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 19-23, and 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Connor (US 6,480,667 B1) in view of Dunn (US 5,517,257 A).

Regarding claim 19, O'Connor teaches a computer readable medium comprising executable instructions (software) for performing a method: comprising receiving a composite signal (see col. 2, lines 5-6; figure 1), displaying a program received on the composite signal as it is received (via bypass 142 from 102 to 120 – figure 1; col. 4, lines 55-58); receiving actuation of a delay control (i.e., suspend video – figure 7), in response to the delay control actuation, delaying displaying of the program, compressing and saving the program to a circular buffer (106-122) as it is received (col. 4, line 65 to col. 5, lines 1-5 and col. 5, lines 9-11), and receiving actuation of the resume control (i.e., un-suspend video – see figure 7), and in response to the resume actuation, decompressing and resuming display of the program as saved in the circular buffer from a time of delay actuation (see col. 2, lines 46-50; col. 5, lines 11-19).

O'Connor does not explicitly teach displaying a user interface comprising a delay control and a resume control, and in response to the delay control action, persisting the user interface on screen with the resume control highlighted. However, Dunn teaches displaying user interface 100 comprising pause control 110 and play control 102 (see figures 3, 5, 6 and 8). Dunn further

Art Unit: 2623

teaches that if the movie is running, the interface 100 is called up when viewer wishes to control VCR-like, i.e., pause, the interface 100 having "play" symbol is displayed. It is noted that the interface 100 having pause control and play control are mutually exclusive in that the play control is useful only when movie is paused, and the pause control is useful only when the movie is running (see figures 6 and 8; col. 7, line 63 to col. 8, line 13; col. 6, lines 36-39). From this view, play/resume control is active or centered attention on when the movie is paused. In other words, the interface 100 with play/resume control highlighted is provided on screen when the movie is paused. That is, the interface with play/resume control highlighted on screen is persisted until the viewer presses play/resume control. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of O'Connor by including the interface having play/resume control and pause control, and persisting the interface with play/resume control highlighted on screen until the viewer presses play/resume control as taught by Dunn in order to provide viewers a convenient, intuitive video control user interface for controlling viewing of video movies on a television.

Regarding claim 20, O'Connor further teaches decompressing and playing display of the program as saved in the circular buffer from the time of delay actuation, while continuing to compress and save the program to the circular buffer as it is received (see col. 2, lines 58-64; col. 3, lines 33-42).

Regarding claim 21, O'Connor as modified by Dunn further teaches that the program is chosen from among a list comprising video on demand and broadcast television (see Dunn: col. 5, lines 26-31).

Claims 22 and 23 recite the similar limitations of claim 19. Accordingly, the similar interpretations with respect to claim 19 are applied to claims 22 and 23. See rejection of claim 19 above.

Art Unit: 2623

Regarding claims 27 and 28, the combined teachings of O'Connor and Dunn include displaying the user interface on a terminal (TV – see Dunn: figure 3), and the terminal comprising an infrared interface and a cable user interfaces (see Dunn: col. 5, lines 1-4; col. 4, lines 8-11; see O'Connor: col. 2, lines 5-8; col. 5, lines 2-5).

Regarding claim 29, O'Connor teaches that the program received on the composite signal is a video program (see col. 2, lines 5-7).

Regarding claim 30, O'Connor teaches that the program received on the composite signal comprises at least one interactive component (e.g., commercial – col. 5, lines 54-56).

4. Claims 24-26 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Connor (US 6,480,667 B1) in view of Dunn (US 5,517,257 A) in view of Rangan et al. (US 6,154,771 A).

Regarding claims 24-26 and 31, the combined teachings of O'Connor and Dunn include the delay control and resume control. Both fail to teach the delay and resume controls are defined by HTML primitives, displaying a user interface rendering at least one HTML primitive, the user interface is displayed on a WebTV terminal, and/or at least one HTML primitive defines a hyperlink. However, Rangan discloses a web-based playback client terminal providing a web browser 70 included VCR-like controls 71 such as pause and resume/play functions for video playback controls. Rangan further discloses playing hypervideo or the feature of hyperlinks (see figures 2, 4; col. 24, line 59 to col. 25, line 18; col. 21, lines 15-21 and 28-33; col. 23, lines 14-16). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the combined system of O'Connor and Dunn by including a web browser included hyperlinks and VCR-like controls such as pause and resume/play functions for video playback controls as taught by Rangan in order to enhance the interactive television system.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ngoc K. Vu whose telephone number is 571-272-7306. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on 571-272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
